

# Anthelion Systems, Inc.

## OVER 25 YEAR

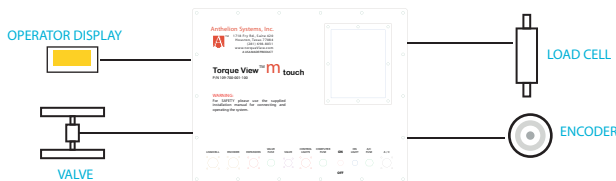

WE BRING NEW TECHNOLOGY TO YOU.

### WHO WE ARE ?

Anthelion Systems, Inc. is a leading edge hardware/software solutions provider. We manufacture industrial instrumentation, data logging systems and wireless controllers. We have been manufacturing torque monitoring systems since 1986. We are now shipping our third generation **TorqueView™** Systems.

### WHAT IS TorqueView™ m System ?

**TorqueView™ m Touch** system is a total solution for torque monitoring. It is a combination of a high end industrial computer and our field proven [in excess of 12 years] in house designed measurement computer in a custom made mobile box. We have upgraded our easy to use **TorqueView™** window program. We have added touch capability and refined all user interfaces for easier and more intuitive user transactions. It is very easy to use and learn.

### WHY SHOULD YOU BUY TorqueView™ m ?

Third Generation • Supports Windows XP or Higher • Makeup Job management • Designed for Touch or Keyboard use • Field tested Superior software & hardware design • Complete report generation package creates in color or black and white • High speed Torque/Turn/RPM data collection choices based on, rotation of the pipe or fixed time • Fail safe high speed valve control • Electronic Torque/Turn/RPM Gauge • Remote display for tong operator • Various equipment safety features • Automated integrity test and calibration • Simple system diagnostic, setup and configuration • Choice of Hydraulic or Strain Gage Load Cells, Tension or Compression, with support for all signal levels • Electronically compensated Load Cell signal measurement and interface • User defined maximum RPM monitoring • Electronic Identification for makeup & equipment traceability • Automatic Load Cell calibration test • Makeup information is available before or during an actual makeup • On demand recall of a previous makeup, during or after a test • Multiple remote operator display capability • Automatic domestic or international A/C power adoption • Custom hardware & software designs and third party labeling available • Excellent customer support • Virtual computer management and operation over wired/wireless, IPAD, IPHONE, TABLETS and others.

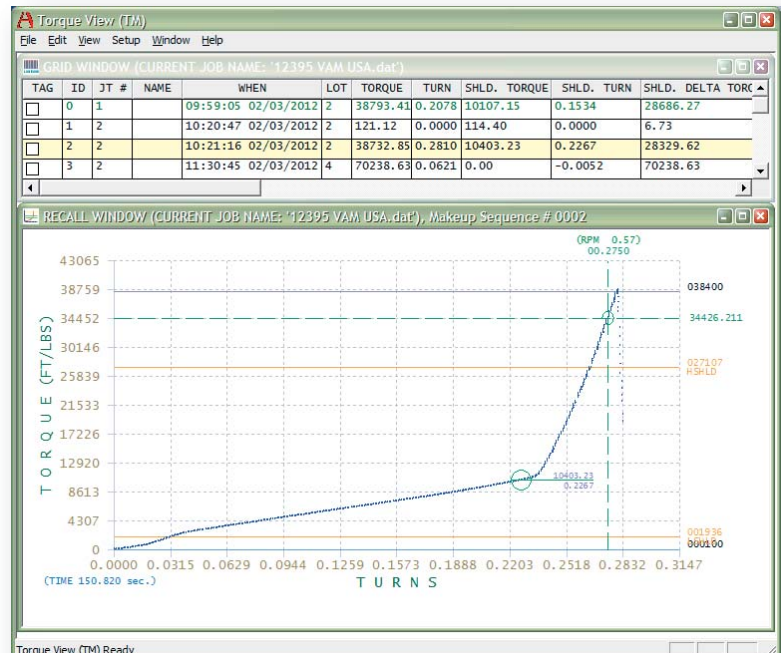

### ARE YOU INTERESTED ?

The complete system includes: a **TorqueView™ m**, an Optical Encoder, a Load Cell and necessary cables. Please contact us for pricing and delivery.

## Torque View™ m touch

The New **TorqueView™ m** series is our total solution torque monitoring system. Includes several additional features to our original **TorqueView™** system that was introduced in 2000,

- More data memory for long makeups
- Higher speed of sampling, torque or turn
- Supports tension/compression and smart load cells
- High speed bidirectional turn measurements
- Measures turns up to 1/10,000 of a rotation in forward or reverse
- Wireless or wired network connections
- Virtual computer control over wired or wireless wide area network or internet.
- Operator diagnostic and integrity testing for, Load Cell (torque) tension or compression, Encoder (turns) make or break and Valve. [field or in shop]
- Operator calibration of Load Cell (torque), Encoder (turns) and Valve timing. [field or in shop]
- Automated Encoder (turns) make or break calibration and setup. [field or in shop]
- Automated job creation and management.
- System designed for easy field maintainability there is only 2 major pieces in the system.
- Digital [data graph] or Analog Bargraph.
- Advance Graph viewing with Zooming feature for best review of makeup graph.

Torque View (TM) Ready  
Premium makeup connection, with POINT drawing option.
